

Entry & Patio Door Systems Ontario

A Complete Door System

A Therma-Tru® door with genuine Therma-Tru parts is more than just a beautiful door. It's a complete door system – from the glass to the hinges – made to perform as good as it looks.

Standard Door Frame

Composite Door Frame

Frame Options

We can help you choose the right frame for your door system.

2 Removable Weatherstrip

Our resilient design compresses when closed and springs back when open. It's protected by a durable jacket for long-lasting sealing power.

3 Hardware

Choose from beautiful options that will complement the look of your home and help bring you security and peace of mind.

4 Ball-Bearing Hinges

Hinges with ball-bearings protect each hinge pivot, offering added support and stability to help keep your door opening and closing smoothly.

5 7-Shape Corner Seal Pads

(Inswing Only) This innovative design creates a protective air pocket that helps prevent a vacuum from wicking moisture up the weatherstrip.

6 Composite Adjustable Sills

These allow flexibility to adjust the sill cap vertically to close gaps, helping to maintain a tight seal between the sill and the bottom of the door.

Standard Mullion

Composite Mullion

Mullion Options

Mullions not only give the hinges and lock a place to anchor, they come in a range of sizes from 1"-3" in width per mullion to help create an entry door system to fit the opening of your home.

7 Dual-Bulb / Dual-Fin Bottom Sweep

(Inswing Only) Two bulbs compress to sit tight against the sill, while two fins act like walls to form barriers and a built-in rain deflector pushes moisture away.
